

Portable Monorail

When you need an overhead fall protection system that's fully mobile, Rigid Lifelines™ Portable Monorail fall protection systems are the answer. Portable Monorail systems combine all the benefits of rigid track fall protection with a sleek design and the advantage of total portability. Systems are easily moved with a large forklift, or can be ordered with the optional steerable rolling chassis package. These temporarily installed systems provide a fixed path of fall protection coverage up to 30° off center. Designed with one or two support columns with cantilevered headers, they provide workers with easy access to a range of vehicles in the ground transportation, air transportation, and ground transportation manufacturing industries.

{NOTE: Our systems are designed with a maximum worker load of 400lbs (on one person systems) when used with 900lb Maximum Arresting Force self-retracting lanyards and properly rated full body harnesses and connecting hardware. Custom systems are available for multiple workers; please inquire with our sales department for more information.}

Counterweights easily moved with fork truck

Fall protection anywhere you need it!

- Standard spans range from 14' to 55', with standard reach starting at 9', and standard height starting at 20'.
- Design options include single and dual track styles for use by one or two workers.
- Bolt-together components require NO WELDING and make set-up easy and quick.
- Overall typical weight of approximately 13,800lbs allows movement via forklift.
- Enclosed track design prevents dirt or ice from interfering with trolley movement.

Choose the Options that Work Best for You!

- Non-pneumatic tires
- Steerable rolling chassis
- Tongue Bar Coupler (Class 3 or higher)
- Drawbar Eye Coupler (for Pintle hitch)
- Leveling jacks
- Single or dual track
- Layered primer with single and double enamel coatings, epoxy coatings, and galvanized finish
